

Demographic Trends and Projections in Texas and the DFW Metro Area and McKinney, TX

McKinney Chamber of Commerce

February 20, 2020

 @TexasDemography

Texas is experiencing significant growth.

Demographic Overview

- Texas is experiencing significant growth.
- Migration is the primary source of growth for metropolitan areas in Texas.
- For the third year in a row, the Dallas-Fort Worth-Arlington metro area added more people between 2017 and 2018 than any other metro in the country.
- About 60% of population change in the DFW metro area can be attributed to net migration.
- Internally, the DFW metro has significant population reallocation, impacting the principal core counties of Dallas and Tarrant in very different ways.
- International migration plays a key role in population growth in the DFW metro area.
- A young and growing workforce could be a competitive edge for Texas and its growing metro areas.
- Demographic shifts may have serious implications for maintaining inclusive and equitable economic growth in the state.

Population Growth of Select States, 2000-2019

	2000 Population	2010 Population	2019 Population	Numeric Change 2010-2019	Percent Change 2010-2019

Source: U.S. Census Bureau. 2000 and 2010 Census Count, 2019 Population Estimates.

Texas added 367,215 people between July 1, 2018 and July 1, 2019.

- About 1,006 people per day added to our population.
 - About 483 persons per day from natural increase (more births than deaths)
 - About 523 per day from net migration (178 international and 345 domestic migrants per day).

Texas Hard to Count Populations

In 2010, an estimated 240,000 Texans were undercounted in the Census.

An estimated 7 million, or nearly 25%, of Texans live in hard to count neighborhoods.

Some projections indicate up to 500,000 Texans could be undercounted in 2020.

Texas Hard to Count Populations

Census research has identified populations that are more difficult for the Census Bureau to count. These include:

- **People of Color**
 - Texas has the second largest number of Hispanics and African Americans and third largest number of Asian populations of all states in the U.S.
- **Immigrants**
 - An estimated 4.85 million foreign born reside in Texas.
- **Children under 5**
 - An estimated 5 percent, or about 2.2 million, of kids under the age of 5 were not counted in the 2010 Census, including about 75,000 Texas children. Children who are not biologically related, Hispanic, live in complex households, live in rented housing, and who have very young parents are even more likely not to be counted.

Census
2020

Texas Hard to Count Populations

- **Single-Parent Households**
 - An estimated 1.2 million Texas households are single-parent households, and all of these households are households with children under 18 years of age.
- **People with Limited English Proficiency**
 - Approximately 8% of Texas households are limited English speaking households, with 85% of these households speaking Spanish, 9% speaking an Asian or Pacific Islander language, 4% speaking Indo-European languages, and 2% speaking other languages.
- **People living in Multi-Family Housing**
 - Nearly 1 in 4 Texas housing units are in buildings with 2 or more units and 15% of Texas housing units are in buildings with 10 or more units.

Census
2020

Texas Hard to Count Populations

- **Renters**
 - Over 1 in 3 Texas households are renter occupied.
- **Larger Households**
 - Approximately 5% of Texas households are considered crowded households, where more than 1 person per room is living in the household.
- **Low Income Populations**
 - Approximately 16% (or 4.2 million) of the Texas population lives below the poverty level.
